

Local Battery Materials and Storage a More Resilient Europe

Batri®

UK MADE BATTERY MATERIALS.
SCALEABLE ENERGY STORAGE SYSTEMS.
STRONGER EUROPE.

Materials

Advanced anode materials

Cells

Enabling next-gen sodium-ion batteries

Energy Storage Systems

Scalable, deployable battery systems

Infrastructure

Powering clean-energy infrastructure projects

THE CHALLENGE:

- Fragile supply chains
- Rising energy demand
- Need for local capability

AVAILABLE NOW:

- UK made anode material
- Sodium-ion ready
- EU development programmes

OUR SOLUTION:

- Grid-scale storage
- Cell integration
- End-to-end deployment

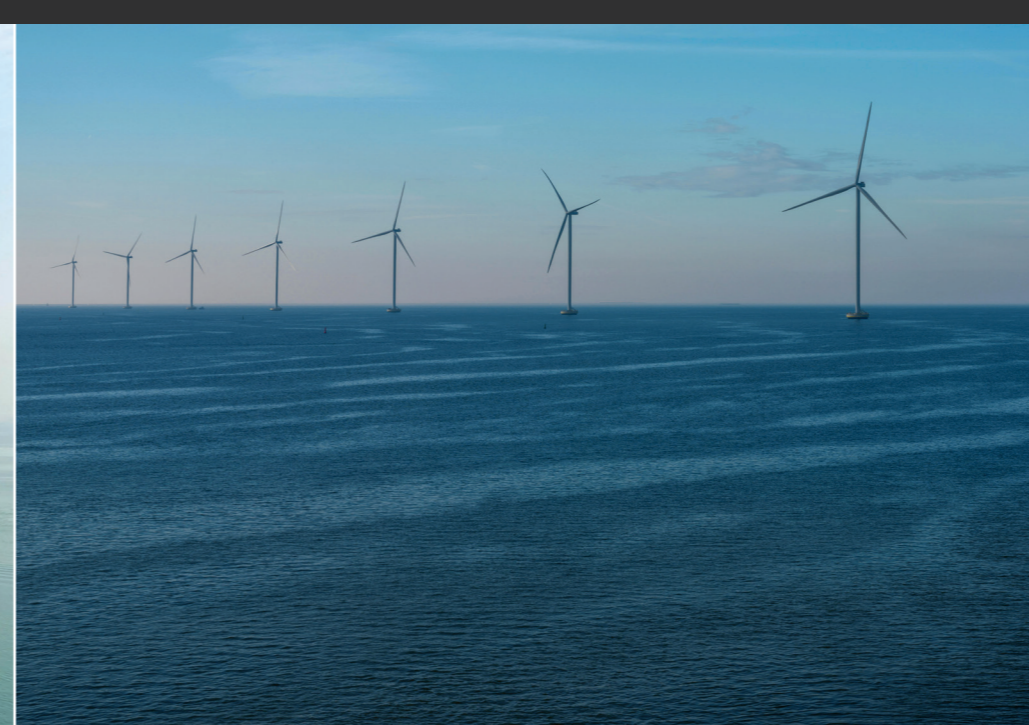

WHY IT MATTERS

UK AND EU CAPABILITY

REDUCING DEPENDENCY

RESILIENT INFRASTRUCTURE

MATERIAL INNOVATION

SEEKING STRATEGIC CONVERSATIONS

- Cell developers
- Battery manufacturers
- Energy storage project developers
- Public-sector and regional development bodies
- Strategic investors

GET IN TOUCH

Conference session:

Dr Stephen Hughes, CTO
Panel Session 3 - Day 2 (9th July) - 13.45 to 14.25
